

Item description

Function:

MQTT is a powerful IoT protocol that has become standard in many industrial automation applications. Both PFC200 Controller (Generation 2) and Touch Panel 600 support an MQTT connection by default. "Multi-Cloud Connectivity" enables the parallel connection of a device to two different cloud systems, IoT platforms or MQTT brokers, allowing different tasks to be implemented in the appropriate cloud application. For example, device management can be performed within WAGO Cloud. At the same time, specific tasks can be implemented in another cloud-based solution, e.g., IBM Watson, Amazon Web Services (AWS) or other specialized IoT platform. Data can also be split up, allowing critical data to go to a local MQTT broker and less critical data to a cloud.

Your Benefits:

- More options and flexibility
- Simple error analysis via configuration in WBM, programming in *e!COCKPIT*
- Taking advantage of two cloud solutions/IoT platforms

Use:

Enter the license into *e!COCKPIT*, assign it to a PFC200 Controller (Generation 2)/Edge Device/Touch Panel and load both the license and project into the device. No other installation steps are required.

Subject to changes. Please also observe the further product documentation!

Data

System requirements

Other required software	<i>e!COCKPIT</i> version: V1.7; Minimum firmware version: 17
-------------------------	--

Delivery

Delivery type	License certificate by email (necessary library provided via <i>e!COCKPIT</i>)
License type (note)	Single license allows installation on one device. One license per device is required.
Note on license type (2)	A PC with both Internet connection and <i>e!COCKPIT</i> may be required for license activation.

Commercial data

PU (SPU)	1 Pieces
Country of origin	QU
GTIN	4055144006292
Customs tariff number	88888888888
