Description: This crossover plate attaches to other Actobotics products and makes attaching to 1" tubing easy. The inner section has a 1.5" hub pattern and has outer flanges for connecting to tube clamps, or other mounts using the 1.5" hub pattern. This works well for mounting 1" tubes perpendicularly.

Actobotics is a robotics building system based around extruded aluminum channels, gears, precision shafts, and ball bearings. Thanks to the two standardized hole patterns, nearly all Actobotics components can be intuitively connected together. The wide range of components makes building complex electromechanical prototypes or finished projects a reality.
